- English – Fluent

ABOUT ME

I'm a UX/UI designer with a strong background in gaming, combining product thinking with a sharp visual eye. I enjoy turning complex flows into intuitive and engaging experiences while keeping both the player and the product goals in mind. My experience in gaming and monetization has taught me how small design decisions can influence engagement, usability and the overall player experience. I work closely with product and development teams to take ideas from early concepts to clear, polished interfaces that feel simple, consistent and fun to use.

WORK EXPERIENCE

- June 2025 – Present
UX/UI & Graphic Design
Mystify, Herzliya, Israel
 - Directed the creative design strategy for BoxMadness an e-commerce and gaming platform specializing in loot box mechanics
 - Designed the complete user interface for the platform focusing on the visual hierarchy and user experience for B2C interactions
 - Developed the architecture and interface for the company's internal back-office software to support administrative operations
 - Managed the production of digital assets utilizing AI-driven tools to enhance design workflows and visual development
 - Executed cross-functional work with product and development teams to translate gaming concepts into functional design layouts and components
- Feb 2023 – May 2025
